TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, January 18, 1922.

Hon. PORTER J. McCUMBER,
Chairman Committee on Finance, United States Senate,
Washington, D. C.

SIR: There is transmitted herewith the report on the American valuation of foreign and domestic products made in compliance with the action of Congress in the "Act making appropriations to supply urgent deficiencies in appropriations for the fiscal year ending June 30, 1922, and for other purposes," approved August 24, 1921.

Respectfully,

A. W. MELLON, *Secretary.*

(iii)

TREASURY DEPARTMENT,
UNITED STATES CUSTOMS, VALUATION INVESTIGATION DIVISION,
Washington, January 18, 1922.

Hon. A. W. MELLON,
Secretary of the Treasury,
Washington, D. C.

SIR: There is submitted herewith report of the valuation investigation which has been carried on in pursuance with the act of Congress. The aim of the inquiry was to find the selling price in this country of the American article and the imported article of all of those products that carry an ad valorem rate of duty in the tariff bill as it passed the House.

For this purpose a staff of investigators was organized, some 60 in number, and an office force in Washington and in New York, which brought the total number of employees up to 85. The investigators were, with few exceptions, examiners in the United States Customs Service and experts of the United States Tariff Commission.

These men were taken from the Government service and put on a new roll. They were paid out of the special appropriation made for this investigation by Congress. It was necessary to make such transfer and such new roll, as the places of those selected had to be filled temporarily by the Customs Service and the Tariff Commission. Quarters were obtained in New York in the United States appraisers' stores and in Washington in the Interior Department Building.

My appointment as director was made on September 27, 1921, and the staff and office force organized immediately, so that work began October 1. At the outset of the inquiry two meetings were held in Washington, one with representatives of manufacturers, and especially manufacturers' associations, and the other with representatives of importers and importing associations. The purpose of the investigation was stated and the cooperation asked of both manufacturers and importers to get at the real facts for the Committee on Finance. Such cooperation was promised and, with very few exceptions, has been received both from domestic and importing interests.

It was decided to take August 1, 1921, as the arbitrary date for getting comparative prices of the domestic and foreign product, except in the case of certain types of merchandise where such elements as seasonal goods or other factors made it necessary to adopt a different date.

In proceeding with the inquiry the first step was to secure samples of current importations with all of the details, from the selling price abroad to the selling price of the importer in this country. The information sought and obtained in connection with the imported article was on five different points:

(1) The foreign selling price; (2) the landed cost—the cost of getting the goods to this country, including transportation, insurance, brokerage, and such charges; (3) the amount of duty paid under the present tariff law; (4) the importer's overhead and profit on his landed cost, which would be the total of the foreign cost, the landing charges, and the duty; (5) the selling price of the importer in the American market.

There was taken as the comparable unit to the importer's selling price the net factory price of the American manufacturer. The samples of current importations were taken to domestic manufacturers in different lines of industry in this country, who were asked for their prices on identical or similar products. In order to make the domestic and foreign goods fairly comparable, in some cases there was added or deducted a certain percentage which was determined as fair by the investigator. In a large number of cases the importers and manufacturers agreed absolutely as to the comparability of their respective products.

In connection with a majority of the paragraphs, samples were obtained by the investigators. These have been filed with the United States appraiser at New York and are available on request.

Outside of the free list, there are 490 paragraphs in the tariff bill as it passed the House. Of these, 342 contain ad valorem duties and 148 contain either specific duties entirely or are definitive and descriptive. Of the 342 paragraphs containing ad valorem rates 6 were not investigated. In Schedule 1 paragraphs 25 and 26 were passed over, as permission was received at a conference with members of the Committee on Finance to omit these paragraphs, relating to dyestuffs, as a special investigation had been made of this matter. Similar permission was given to omit paragraphs 1101 and 1102, which are those relating to raw wool. Paragraph 410 was passed by, as it is the same as paragraph 409, except that it provides for an additional 5 per cent duty when boxes and barrels and such articles contain fruit. Paragraph 1458 is the blanket paragraph dealing with nonenumerated manufactured and unmanufactured articles, and it was therefore determined unnecessary to make inquiry into this catchall provision. There are thus 336 paragraphs of the bill as it passed the House which were the subject of this investigation. In a number of these it will be found that there were no importations, and in a number of other cases there was nothing found of domestic manufacture comparable to the imported article. In the great bulk of the paragraphs, however, identical or fairly comparable foreign and domestic products have been found and comparative selling prices obtained.

It will be appreciated, of course, by the committee that the present was a very unfavorable time for the making of an investigation into prices because of industrial conditions, both here and abroad, that are well realized and do not need telling or description. It is because of this fact that there are lacking in so many paragraphs any record of importations.

Upon the sheets of the report there is given in connection with each investigation the number of the investigator, and a list is inclosed giving the names of the men to correspond with these numbers. The services of the people who did the investigation are available for further information desired by the committee.

Respectfully,

JAMES B. REYNOLDS, *Director.*

Photographic emulsion, gelatin, dry broken; made from calf stock. The foreign gelatin is better for the applied use. ¹
Japan.....	Agar agar, manufactured from a species of seaweed, packed in bales containing 1,000 pieces.		16-pound bale.	15.563	2.82	34	20 per cent.....	3.112	39.6	8.505	30.00		20	39	do.....	23	25.....		
England.....	Agar agar, whole, in strips.		Pound.....	.38	.0307	34	do.....	.076	10.9	.0533	.54		14	39	do.....	23	15 cents per pound plus 20 per cent.		

¹ The emulsion maker creates what is termed an emulsion "blend," composed of a number of parts each from a different grade of quality of suitable gelatin; they therefore find it desirable and frequently necessary to use the higher priced German gelatin in order to produce the desired result, which is technically termed "quality." They will pay almost any price for the suitable German grade, and this condition is taken advantage of by the German manufacturers. Impossible to make percentage allowance.

Apparently no United States makers are producing low carbon ferrochrome. The price is that at which manufacturing could be profitable under present conditions. Actual costs are probably 28 to 32 cents per pound chromium contained. Sold at a loss. This product extensively used in European steel works, replacing ferromanganese and ferrosilicon, but not favorably received in United States.

¹ Included in selling price of foreign Westminster clock is \$5 for repolishing and regulating.
² The manufacturer states that the actual cost of this plane with motor is \$7,701.70, but is sold for \$3,300 to agents because of importations, at a cost of \$1,700 f. o. b. New York, freight, duty, and expenses included. Inquiry as to the importations was made, and it appears that the last importation was made in 1920 and that part of it was exported and the balance, consisting of 65 motors, etc. are now in the possession of the United States customs, having been abandoned by the importers. There is, consequently, no American selling price of these planes as of Aug. 1, 1921, or of any date within months prior and subsequent thereto. One plane was imported in May, 1921, and two others in October, 1921, but that is the total importation of airplanes for a year.

¹ Included in overhead and profit is an additional charge of \$0.15 for waterproofing in United States. Merchandise as imported is not treated or waterproofed but is sold and known as waterproof cloth and so classified. Since this waterproofing is done in the United States, the merchandise might be classifiable under paragraph 903. Usual overhead and profit, 26 per cent.

¹ Domestic manufacturers have liquidated and are selling old stocks on basis of replacement prices, which is approximately 30 per cent less than old prices; foreign manufacturers are still selling on the basis of the old cost.

SCHEDULE 11.—WOOL AND MANUFACTURES OF.

NOTE.—The comparison of the foreign and domestic prices of manufactures of wool are based on free wool. At the time this data was procured the American prices had not yet been enhanced by the amount of a duty on raw wool. Prior to the enactment of the emergency tariff law there had been no duty on imports of raw wool since 1913. The prices of wool in the United States at the time when the emergency tariff went into effect were at a parity with world prices of similar wools. The stocks then on hand were so large that it was not necessary to import clothing wools during the remaining nine months of 1921, and there was practically no enhancement of the prices of clothing wools in the United States up to the time when the prices herewith reported on manufactured goods were obtained. The reduction of the excess stock of wool in the United States through consumption has since resulted in a gradual increase in the domestic prices of raw wool compared with the parity of foreign prices; and as the total domestic consumption is now at the rate of considerably more than twice the quantity of the home production, it must be expected that the importation of raw wool will soon be resumed. Since the imported wools will cost as much more than the foreign price as the actual duty paid thereon, it must be assumed that American prices will by that time be enhanced by the amount of the duty actually paid; otherwise, if wools already in the country could be obtained at less than the foreign cost of similar wools plus the duty, imports will not be made. To determine the difference there will be between foreign and American prices when the raw-wool duty becomes fully effective, it will be necessary to add to the respective American prices presented herewith an amount equal to the dutiable cost of the wool contained therein.
